

Spring 2015 Robotics Competition

Roboticists, thank you for helping the World Archaeological Society, WAS, explore the Ancient Roman Empire, which resulted in discoveries that help us understand our past and plan for our future! WAS now needs you to build a robot to deploy DigBots at archaeological sites in other regions of the former Roman Empire. Please help WAS continue to uncover the Ancient Roman Empire!

Below is everything that we know about the mission.

- The team must be ready to execute the mission for your EARLY Tournament.
- The equipment available for a team to build a robot is 3 LEGO® Simple & Motorized Mechanisms Kits.
- The following diagram presents the environment that will be encountered. Construction details are found in the *Mission Field Details* document.

Field 48" × 48" ½" Plywood Field Perimeter 2" x 4" Boards

Home (Gallia) 15" × 15"

Atlantic Ocean $7\frac{1}{2}$ " x 15"

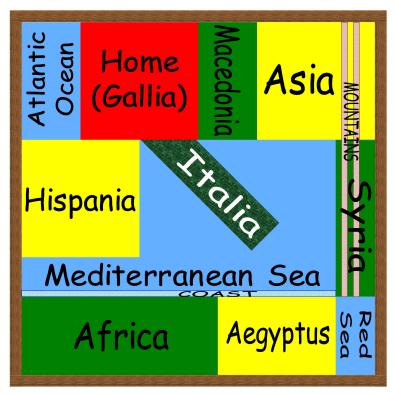

Hispania 15" × 15"

Italia 20" x 5" @ 45° ³4" Plywood

Mediterranean Sea 40" × 20"

Coast $\frac{3}{4}$ " $\times \frac{1}{4}$ " Molding

Africa 25" × 10"

. . .

Macedonia

7늘" x 15"

Asia 15" × 15"

Syria 5" × 20"

Mountains
2 strips
3/4" × 1/4" Molding
3/4" from Mediterranean Sea
3/4" apart

Aegyptus 15" × 10"

Red Sea 5" × 10"

Ancient Roman Empire

The following diagram presents where the *DigBots* and *Carriers* will be in the Ancient Roman Empire. Abacus Carrier Chariot Carrier Arch Carrier Aqueduct Carrier Calendar Carrier Law Carrier Road Carrier

Mission Rules

- 1. The team has 2 minutes to complete the mission.
- 2. There are 84 *DigBots* on the mission field at the beginning of each mission, represented by dominoes. Domino details are found in the *Mission Object Details* document.
- 3. There are 7 *DigBot Carriers* on the mission field at the beginning of the mission constructed from one LEGO® Simple & Motorized Mechanisms kit. Carrier details are in each *Carrier Instruction* document.
- 4. The team's score is determined at the end of the 2-minute mission.
- 5. If a *DigBot* is moving when time expires, the *DigBot*'s scoring position is determined when the *DigBot* has come to rest.
- 6. There are four scoring zones: ITALIA, MACEDONIA, SYRIA, and AFRICA. The MOUNTAINS contained within the borders of SYRIA are part of SYRIA.
- 7. The goal of the mission is to deploy **DigBots** in the scoring zones.
- 8. A *DigBot* is *deployed* when the *DigBot* is directly supported by the mission field or other *DigBots* that are *deployed*. A *DigBot* is *NOT deployed* if it is on a *Carrier* or on a robot.
- 9. The team scores 2 points for each *DigBot* that is deployed in MACEDONIA, SYRIA, or AFRICA.
- 10. The team scores 3 points for each *DigBot* that is *deployed* in ITALIA.
- 11. There are three penalty zones: the Atlantic Ocean, the Mediterranean Sea, and the Red Sea. The Coast is part of the Mediterranean Sea.
- 12. The team is penalized 1 point for each *DigBot* deployed in a penalty zone.
- 13. A DigBot deployed and breaking the plane of a scoring zone is considered deployed in the scoring zone.
- 14. A **DigBot** deployed in multiple zones simultaneously (scoring zone & non-scoring zone, scoring zone & penalty zone, penalty zone & non-scoring zone, etc.) is considered deployed in the zone that results in the greatest points.
- 15. Please remember that a DigBot must be "deployed" in a scoring zone for a DigBot to count for points. A DigBot is deployed when the DigBot is directly supported by the field or other DigBots that are deployed.
- 16. Only the parts that are contained in three LEGO® Simple & Motorized Mechanisms kits along with nine 20" controller extension wires may be used to construct the robot and attachments (i.e. no other materials such as glue may be used on the robot). The kit parts may not be altered.
- 17. HOME (Gallia) is the $15" \times 15"$ boundary extended vertically.
- 18. The robot and all attachments must begin completely inside **HOME** at the beginning of the 2-minute mission (i.e. no LEGO parts may be off the playing field when the mission begins). The parts do not have to be assembled together and the parts may be removed from and returned to the field during the 2-minute mission.

- 19. The team may retrieve their robot without penalty when the robot is partially inside **HOME** by lifting the robot vertically. After retrieving, the robot must be returned to **HOME**. If a **DigBot** or **Carrier** remains with the robot when the robot is retrieved, the **DigBot** or **Carrier** must be removed from the field.
- 20. If a team touches their robot, including parts that have become separated from the robot, that is completely outside HOME, the team is penalized 10 points. After touching, the robot must be returned to HOME to continue the mission. If a *DigBot* or *Carrier* remains with the robot when the robot is returned HOME, the *DigBot* or *Carrier* must be removed from the field.
- 21. The robot must start completely inside **HOME** every time the robot is returned **HOME** (i.e. after retrieving the robot, no part of the robot may be breaking the **HOME** plane when continuing the mission).
- 22. The controllers and wires are NOT considered part of the robot.
- 23. The controller wires may only be used to provide electrical power to robot motors (i.e. the controller wires may not be used to drag or corral a robot, *DigBot*, or *Carrier*). If a controller wire is used illegally, the robot must be immediately returned *HOME* to continue the mission and the *DigBots* and *Carriers* involved must be removed from the field.
- 24. The robot shall not have any elastic stored energy when the mission begins or when the mission continues after the robot is returned **HOME**, but elastic stored energy may be created with a motor during the mission (i.e. the robot may not be "wound up" manually).
- 25. If a team touches a *DigBot* or *Carrier* that is partially or completely inside **Home**, the *DigBot* or *Carrier* must be removed from the field. If a *Carrier* is touched, the *Carrier*, along with any *DigBots* on the *Carrier*, must be removed from the field. This rule allows *DigBots* and *Carriers* to pass through **Home** but does not allow for team members to manipulate *DigBots* and *Carriers* either directly or with "LEGO Utensils" while in **Home**. This rule also allows *DigBots* and *Carriers* to be cleared from **Home** without penalty. This is the *EARLY Game Changing Rule* intended to make the Spring Mission more challenging than the Fall Mission.
- 26. If a team touches a *Digbot* or *Carrier* that is completely outside **HOME**, the team is penalized 10 points and the *Digbot* or *Carrier* must be removed from the field. If a *Carrier* is touched, the *Carrier*, along with any *Digbots* on the *Carrier*, must be removed from the field.
- 27. A Carrier is never considered part of the robot.
- 28. Because *DigBots* are very valuable, the team is penalized 10 points for each *DigBot* ejected from the field. No penalty shall be assessed for a *DigBot* that is removed by rule (e.g. for illegal touching, dragging, etc.).
- 29. A score of zero shall be awarded if penalties result in a negative score.

Please contact Mission. Control@EARLY robotics.org with any questions or comments.

Thank you for maintaining the spirit of the game!
